

Question 1:

Two fathers took their sons fishing. Each man and son caught one fish, but when they returned to camp there were only three fish. How could this be, even though they did not eat or throw back any of the fish they caught?

Question 2:

A king, queen and two twins are all lying in a room, yet there are no adults present.

How come?

Question 3:

If you wrote down all the numbers from 400 to 500, how many times would you write the number 4?

Solutions:

1. There were only three people fishing: the son, his father and his grandfather.
2. The king, queen and two twins are different sizes of beds.
3. 120 times.
100 in the hundreds place, 10 in the tens place and 10 in the ones place.
